One Call • One Solution

DMC - A Shock Value of Electrical Services

DMC Facility Services is a one stop shop for all of your Commercial Electrical Needs. They provide solutions to power-driven problems from every angle to produce efficiency . DMC is an authorized “Marlin Lighting” systems repair and maintenance representative, where all the technicians are trained by a Marlin Controls Representative to conduct on-line programming for dimming panels adjusting via modem. Through this they clean and maintain your dimming panels to ensure proper operation, minimize down time and increase energy. DMC Services arranges Point-of-Sale (POS) Installations with experienced installers who knows the technology and understand your operations. Their Project Managers expertly manage your roll-out from conception to completion through Site Surveys, Project Coordination, and Staging/ Integration.

DMC works along with Carolina Products Inc. (CPI) in control systems integrated with unitized switchgear into a single package. The combined results are custom and designed to assist customers to meet their goals. Carolina Products Inc. specializes in identifying, developing, and implementing innovative strategies that save time and money associated with DMC’s performance. Also, a close partnership is shared with Lightolier as another number one resource for Commercial, Outdoor, Landscape, & Rooftop Lighting. Our master Electricians are Emergency Lighting Certified to correctly determine type, operational duration and position of emergency lighting and perform the required emergency lighting tests along with the removal/ replacement of faulty emergency lights.

Thermal Imaging Scans (Infrared Thermography), is a method that DMC specializes in to detect radiation in the infrared range of the electromagnetic spectrum and produce images of that radiation, called thermograms. Thermograms are visual displays of the amount of infrared energy emitted, transmitted, and reflected by an object through Thermographic cameras. DMC Facility Services also delivers LED Lighting Upgrades such as: Ballast, Fixture Retro-fits, HID to Fluorescent CFL or LED, and Exit Sign Retro-fits. The DMC team thinks on their feet to complete Electrical Projects of Equipment Installation. This includes: power distribution, producing plans, the flow process, control wiring needs, back-up power systems, and aggressive scheduling to optimize value and control cost.
