DMC - Your Vendor Partner in Reducing Costs

DMC Facility Services is your preferred Vendor Partner in cutting costs for your Facility. It combines reducing expenses and improving profitability. One of today's top trends in Facility Maintenance and Service is to "do more with less." This is done by using new approaches in this field and by creating long term sustainability. Maintenance and efficiency will then be increased between us and the Facility Managers (FM's) through keeping track of performance and a tighter budget.

DMC Services uses methods such as value-driven design and energy conservation. We squeeze the most functionality out of every square foot we are provided to work with, workspaces that are flexible, able to accommodate multiple functions have a renewed emphasis on maximizing usage and practicality. Energy Conservation will expose the areas in need of improvement and ways to boost overall energy efficiency at your facility. This trend is related to the rise of urgency in cutting costs. Some of the ways we meet these needs are by using and installing LED Lighting, and by staying on top of your Marlin Panel Programming and Cleaning.

We are the Industry Leaders in regularly scheduled maintenance crafted by our experienced Commercial Handymen. Our overnight crew of Technicians specialize in equipment installation, interior/exterior Paint Restorations and Bar Refresh Programs. We are available 24 hours a day to complete Emergency jobs such as Grout/Tile Services and Concrete Repairs. DMC focuses on core competencies to remain in control of each project. Let DMC Facility Services be your trusted Vendor Partner in reducing your facility's costs and increasing your facility's productivity!
